

# NONO EXCHANGE

WHITEPAPER

# Introduction:

Welcome to the white paper of a project that sets an ambitious goal of creating the first-ever swap exchange based on Artificial Intelligence (AI) technology and the first place where you can trade crypto, forex, commodities, and stocks. Our main objective is to revolutionize the way users conduct transactions on cryptocurrency exchanges.

The main point of our exchange is multilingual call center support. Even small forex brokerage houses want much more money and clients than huge crypto exchanges. If one form of tier-one exchange will just add a call center and salespeople that can connect and convince people to trade and feel secure, they will start earning huge money. We want to have two offices in Limassol, Cyprus, and Dubai, United Arab Emirates, and at least 18 languages salespeople.

In this white paper, we will delve into the workings of our platform, the technologies employed for AI implementation, competition analysis, our deployment plan, and future development goals. We firmly believe that our innovative AI-based swap exchange will empower cryptocurrency market participants with greater success and efficiency in their investments. We invite you to further explore our project and join us on this revolutionary journey.

We want to improve investors' understanding of how our exchange will be the top choice in the whole crypto market!

## Our Vision:

Our vision is to create the world's first exchange with multilingual call center support. Currently, no cryptocurrency exchange offers a service that calls customers directly. This type of support is typically reserved for brokerage firms. In the crypto world, opening an account on an exchange usually requires reading information or watching YouTube videos. In brokerage firms, we have employees who make calls and assist clients. It's also crucial to build a range of smaller applications on our platform, such as swap, launchpad, and bridge.

This will enable us to serve the entire crypto market. Just imagine how our Launchpad would perform if sellers in every language called customers and presented them with great offers? Its results would be incomparable to those of Binance - it would be monumental.

And most importantly, on our platform, every trader will find something for themselves - whether it's indices, forex, cryptocurrencies, stocks, commodities, and much, much more, all in one place

## Impact of AI on Cryptocurrency Swap as a part of our exchange

Cryptocurrency swap combined with AI technology can function efficiently and innovatively. Here are three key aspects of how AI can influence the operation of cryptocurrency swap:

**Optimization of Trading Strategies:** AI technology can analyze vast amounts of market data, considering multiple factors such as price trends, trading volumes, technical analysis, and more. This allows AI to detect patterns that may be challenging for the human mind to identify. Based on these analyses, AI can generate optimal trading strategies, utilizing various swap types and selecting currencies accordingly. This enables more accurate prediction of market movements and better-informed investment decisions.

**Process Automation:** Leveraging AI technology allows for the automation of trading processes. AI algorithms can be programmed to execute transactions automatically based on predefined strategies and parameters. This eliminates the need for manual market monitoring and enables instant responses to changing conditions. Process automation significantly increases transaction execution speed and reduces the risk of human errors.

**Risk Management:** Artificial intelligence can effectively assess the risk associated with various transactions. Through advanced algorithms, AI can identify potential threats, such as price fluctuations, unpredictable market trends, or asset volatility. Based on these analyses, the swap platform can implement restrictions and safeguards that help minimize risks for investors.

In conjunction with AI technology, cryptocurrency swap becomes a more dynamic, intelligent, and efficient mechanism, providing market participants with enhanced investment opportunities and advanced, personalized solutions. However, it is crucial to remember that any AI-related solutions require proper security measures and rigorous testing to avoid potential risks associated with automation and data analysis.

## Confirmation of Effectiveness:

After thorough verification of the efficiency and performance of our AI-powered swap exchange, we proudly confirm that our solution brings tangible benefits and achieves its intended objectives. Historical testing, simulations, and real-world monitoring have confirmed significant improvements in the speed, profitability, and stability of our system. In comparison to other popular cryptocurrency exchanges, we take pride in asserting that we are a leader in advanced AI-based solutions. We have gained the trust of our users, who recognize our platform as a key force shaping the future of the cryptocurrency world through innovative technologies.

## Our platform and App

Our platform and app provide traders with various opportunities. Among others, trading over 150 CFDs including forex, commodities, stocks of well-known companies, and primarily cryptocurrencies. The core feature is the DEX model with AI, facilitating the swapping of various cryptocurrencies to those accepted on our exchange with leverage. Clients can utilize the swap even without engaging in leveraged trading. For those participating in leveraged trading, anyone depositing our token will receive bonus USD, which can be used in trading. Crucially, we operate as an ECN, meaning we don't go against the client but send their positions to a liquidity provider, acting as the other side of the transaction. In the app and on the platform, traders will have access to a calendar, copy trading, news, and several other essential analytical tools to aid their investments. In the future, we'll introduce the capability to create AI-based bots, allowing everyone to build their own super investment mechanism.

## lottery

Lottery, a chance for everyone. In the near future, we are planning to reintroduce the lottery on our exchange, where participation will be possible only with NOI tokens. We have plans for two major draws per week and daily smaller ones. We aim for all winnings to be paid out in USDC and to be transparent through blockchain transaction links. Half of the tokens from ticket purchases will go towards the jackpot accumulation, while the other half will be burned. We envision the lottery launching in the third quarter of 2024.

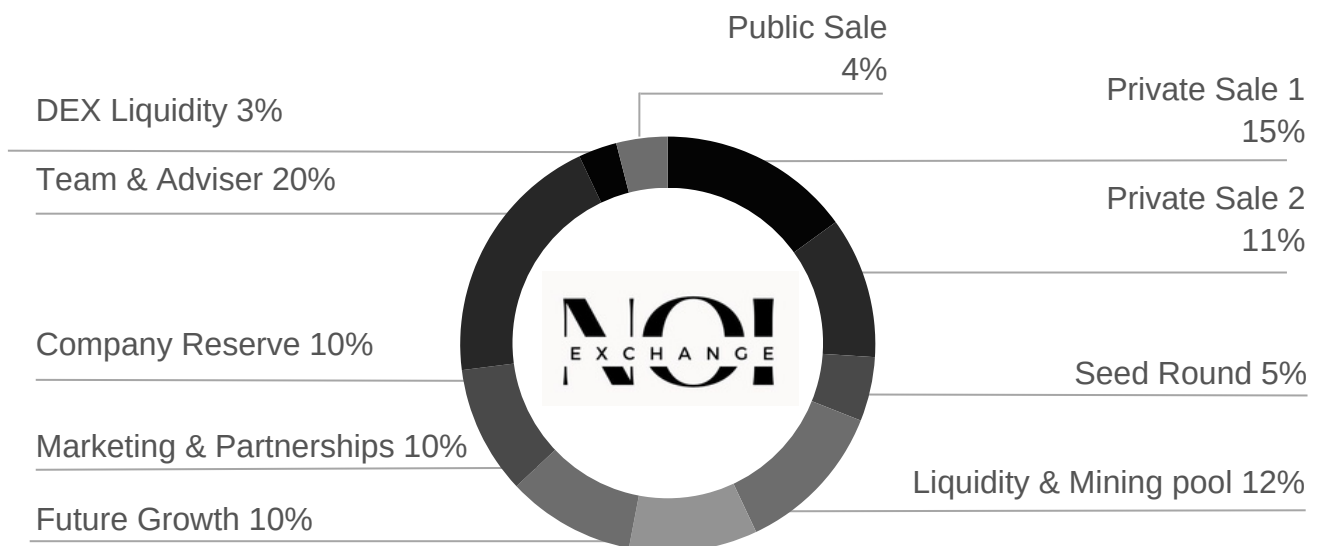

Furthermore, lottery payments will be facilitated through WEB3, providing enhanced security for every transaction. On one hand, every client will have anonymity ensured through cryptocurrencies, while on the other, the transparency of lottery payouts will be verifiable through the blockchain scanner. This will be the first large-scale lottery in the crypto market, setting a new standard for transparency and security.

# Tokenomics:

• Total Supply	10 000 000 000
• Soft Cap	TBD
• Hard Cap	TBD
• Listing Price at Launch	TBD
• Market Cap at Launch	TBD
• Circulation Supply on Launch	1 500 000 000
• Percentage of Total Supply	15%
• Fully Diluted Valuation	TBD

## Token Release Schedule:

- 100% from liquidity and mining at TGE
- 100% Dex liquidity at TGE
- 100% Public sale at TGE
- 10% company reserve vesting over 24 months from TGE
- 20% team and advisors: 50% released after 24 months from TGE, then 5% every 3 months
- 10% marketing and partnerships: 30% airdrops, 40% released after 6 months from TGE, 15% after 12 months from TGE, and the remaining 15% after 24 months from TGE
- 5% seed round: 50% released after 9 months from TGE, the remaining 50% after 18 months from TGE
- 15% private round 1: 25% released after 6 months from TGE, and 25% released every 6 months thereafter
- 11% private round 2: 50% released after 24 months from TGE, and 25% released every 12 months thereafter
- 10% for future growth: 50% released after 12 months from TGE, and the remaining 50% released after 36 months from TGE

# ROADMAP:

## The Future of AI-Powered Swap Exchange

### Phase 1: Research and Development q2 and q3 2023

- Assemble a research and development team responsible for implementing AI technology into the swap platform.
- Establish specific goals, guidelines, and a project schedule.
- Analyze the competition and identify unique opportunities our exchange can bring through AI.

### Phase 2: Prototyping q4 2023

- Create a prototype of the AI-powered swap platform with initial versions of AI algorithms.
- Test the prototype on internal test markets to evaluate performance and functionality.
- Optimize and tailor AI algorithms based on test results.

### Phase 3: Deployment q1 2024

- Prepare a beta version of the swap platform, inviting selected members of the cryptocurrency community to participate as testers.
- Test the beta platform in real-world conditions, gather feedback from users for continuous refinement and adjustment.
- Ensure adequate infrastructure and security measures for a fully functional deployment.

#### Private Round Sale:

- Conduct a private round sale for institutional investors, accredited investors, and strategic partners.
- Raise funds to support further development and full deployment of the swap platform.
- Offer special terms and bonuses to participants of the private round in return for early project support.

#### **Phase 4: Full Deployment and Start of platform q2 2024**

- Introduce the full version of the swap platform to the public.
- Focus on marketing and distribution to attract new users and increase awareness about our exchange.
- Open first office in Limassol Cyprus
- List the exchange on tier 1 platforms to expand accessibility.

#### **Phase 5: Collaboration and Integrations q3 2024**

- Initiate collaborations with other cryptocurrency projects and companies in the ecosystem to expand the platform's applications.
- Start our Lottery
- Open second office Sharjah UAE

#### **Phase 6: DeFi and NFT Ecosystem Development q4 2024**

- Expand our swap exchange to incorporate the DeFi segment, enabling users to participate in various financial protocols and products.
- Introduce features for trading and managing NFTs on our platform, allowing users to access unique digital assets.
- Lottery mode working online

#### **Phase 7: Global Expansion 2025 and 2026**

- Expand our operations to new markets, reaching users from various regions around the world.
- Implement multilingual interfaces and adapt the platform to local needs and regulations.
- I've written that we plan for our company, like Coinbase in the United States, to be present with its shares on the stock exchange in Abu Dhabi.

## OUR TEAM

**Piotr Zalewski**

Piotr Zalewski, our CEO and Sales Director, brings a wealth of experience to the table. His journey began with pivotal roles in brokerage firms, forex markets, and private banking sectors. With a robust background spanning across various financial institutions, Piotr spearheads our sales team, dedicated to servicing clients and ensuring their seamless navigation through the intricacies of the stock market. Since 2017, he has been actively engaged in the crypto market, both as an investor and sales professional, further enriching his expertise in the dynamic landscape of finance.

**Dr. Grzegorz Kwiecień**

Grzegorz Kwiecień, our Head of Legal, is a seasoned legal expert with a Doctor of Law degree. With extensive experience as a prosecutor and lecturer, he brings a wealth of knowledge to our team. Since 2020, Grzegorz has been actively involved in the crypto market, adding a new dimension to his expertise. His primary responsibilities include overseeing our company's legal affairs, ensuring compliance, and acquiring crypto and payment licenses to facilitate our operations. Grzegorz is a formidable asset, adept at navigating the complexities of the legal landscape in the ever-evolving world of cryptocurrency.

**Nitin Yadav**

Nitin Yadav, our Head of Developers, leads our IT team with precision and expertise. With years of experience under his belt, Nitin ensures that our applications are developed to the highest standards. His primary focus is on overseeing the IT team and ensuring the seamless creation of top-notch applications. With a deep understanding of the crypto market since its early days, Nitin brings invaluable insights to the table, driving innovation and excellence in our development processes.

## CONCLUSION:

Our white paper presents a comprehensive vision for the future of a swap exchange revolutionized by Artificial Intelligence (AI). We aim to create an advanced platform that offers users unique investment opportunities, transaction speed, and optimal tools.

At the end, we would like to mention that on our exchange, every client will have the opportunity to receive a bonus by investing with our token, which practically guarantees an increase in the desire to purchase our token and consequently its price.

To achieve this, we plan to open multiple offices worldwide, including in Cyprus, the UAE, Georgia, Panama, and Indonesia. This will allow us to smoothly operate in different time zones and languages, as well as to obtain various licenses.

Such an exchange idea is the future that must come; the market will civilize and develop, and for it to thrive, clients must trust it, and our business idea ensures such trust among clients.
